

C3-08 Targeted Remediation Cards

Repair the exact failed production competency

2026 LEARNER EDITION

Option B institute family: Charcoal #1F2937 | Teal #14B8A6 | Soft Blue #3B82F6 | AMOLED-ready companion shell.

Contract / severity

Restate grain -> consumer harm -> measurable check -> consequence -> owner. Use changed data before retest.

Reconciliation

Compare counts, key sets, totals and common-key values independently. Never use a single metric as proof.

Freshness / SLO

Fix observation time, expected partitions, indicator formula, target window and action threshold.

Observability / incident

Restore correlation context, timeline, containment, evidence-backed cause, bounded repair and post-repair proof.

Security / privacy

Remove exposed values, rotate/revoke if needed, restore least privilege and prove a negative access path.

CI / promotion / IaC

Make validation a hard dependency, protect the environment, review plan/state/drift, and define safe rollback/roll-forward.

Trade-off / ownership

Write options, evidence, rejected alternative, owner and measurable review trigger.
