2026 LEARNER EDITION

Option B institute family: Charcoal #1F2937 | Teal #14B8A6 | Soft Blue #3B82F6 | AMOLED-ready companion shell.

Expected defect control

GR004 mwh differs: source 55.0 vs target 49.7; total source 321.3 vs target 316.0.

Review method

Compare your grain/key, reconciliation evidence, severity/publish decision, incident sequence, bounded recovery, post-repair proof, prevention, security/privacy, runbook and design reasoning. Diagnose only weak competencies. Do not copy this review into the next Gate.

Changed micro-retest

Repair the failed competency on a changed synthetic condition. A targeted repair does not open the next full Gate. Gate B/C require explicit full-retest assignment.
