

COURSE 3 - DATA ENGINEERING 2026**C3-103R - TransitOps Review**

Protected diagnostic review. Open only after a saved TransitOps attempt.

Artifact	C3-103R
Status	2026 - LEARNER EDITION
Phase	C3-09 Production Capstone & Engineering Transition 15 lessons 36-48 focused hours
Prerequisite	C3-08 Gate PASS; all earlier C3 evidence retained.
Assessment boundary	C3-104 is the phase Gate only. C3-113 remains the later course-wide Final Production Gate.
Brand	Charcoal #1F2937 Teal #14B8A6 Soft Blue #3B82F6 AMOLED #000

House teaching rule: requirement -> mental picture -> small proof -> guided integrated build -> expected result -> why it worked -> break/fix -> changed independent case -> validation -> production reasoning -> evidence. Integration is not mastery until the learner can explain and recover the system independently.

Review path

Find the first non-passing competency, repair only that area, close this review, then complete a changed shipment-domain retry. Do not copy RetailPulse implementation wholesale into TransitOps.

Strong integrated evidence

- Correction T903 converges exactly once under replay.
- Layer and serving contracts have distinct grain/trust/ownership.
- Orchestration/reprocessing is bounded and idempotent.
- Spark/scale component has a parity invariant against a small deterministic reference.
- Quality gate catches semantic delivered-duration defect and blocks publish.
- Incident proof includes containment -> repair -> rerun -> reconciliation -> prevention.
- README/runbook let a fresh reviewer reproduce and operate the drill.
